

The Solar-Powered Roof Fan That Keeps You Cool

Solar Star's Roof Mount Roof Fan is the Ideal Ventilation Solution

Solar Star, the leader in solar powered roof ventilation, brings you the most technologically-advanced, environmentally-friendly, ventilation solution today. Best of all, Solar Star brings you the solutions that cost nothing to operate. Imagine the savings.

By placing the unit where it is most effective, the highest point on the roof, it can properly circulate air and ventilate your roof space, transforming your home into a comfortable living environment. Powered by Solar Star's proprietary 10-watt solar panel, this breakthrough product has been designed to last season after season.

This sleek, unobtrusive design is for most roof applications

Suppress Heat Build Up

A hot roof acts like a giant radiator, transferring heat into your living spaces, sending both utility bills and temperatures soaring. In colder climates, heat build-up in a roof causes snow to melt and run down where it freezes at the eaves, causing destructive ice damming.

Solar Star:

- Reduces heat build up
- Reduces air conditioning costs
- Prevents ice damming

Battle Moisture

Many of today's houses have insufficient ventilation and air exchange. This causes high humidity levels from everyday activities. This moisture migrates through the ceiling towards the roof where it comes in contact with the cold structure. Here, ice and frost form, causing damage to your roof structure. Additionally, moisture can saturate insulation, promote fungal decay and plywood delamination.

Solar Star:

- Reduces damaging condensation
- Protects insulation from moisture saturation
- Fights mold and fungal decay
- Reduces heating costs
